Recommendation / Restriction

- Indoor installation only. Integration of DIN modular devices up to 63A

Installation

- Practibox S by Legrand have an optimised wiring space thanks to comfortable cabling spaces on all sides, a 150mm between DIN rails and a removable frame allowing wiring in the workshop. A dedicated joining kit, also available as an accessory, allows an easy assembly for flush-mounting cabinets. Also, a cut-out on the back of the packaging can be used to protect the flush-mounting box during installation.

Usage

- Practibox S cabinets have an attractive and modern appearance designed for the residential sector, both houses and flats, and for small office buildings. The cabinets can be delivered with a white door which blends harmoniously into any interiors and gives an aesthetic touch in your home or commercial shop. The smoked door is also available in order to easily verify if your installation is operating correctly.

Avantages

- Thanks to an extensive offer scope from 4M to 72M, Practibox S cabinets cover a large range of needs on your work sites. They are adapted to any configuration regardless of the type of installation, flush-mounted or surface-mounted, in residential or small office buildings.
