# Configure your projects quickly and easily

eDesign is a web tool for you to configure and quote residential and small commercial buildings projects quickly and easily. With a simple user interface, you can design switchboards, prepare a list of materials, generate single-line diagrams and labels.

## eDesign at a glance

### Intuitive time-saving tools

Follow a few simple steps to get a complete configuration of your electrical panel, switches, and sockets – including smart home solutions.

### Virtual panel assembly

Visualize your final panel as it would look in real life and make any necessary adjustments right away on your computer.

### Standards and norms compliance

Be reassured that your electrical installations are fully compliant with your country's standards and norms.

### Instant quotation and list of materials

Generate a quotation for residential and small commercial projects, a list of materials, or single-line diagrams and labels on the spot to share with your customers and wholesaler.

### Instant saving and sharing

eDesign has an intuitive user interface which adapts to your specific residential or commercial projects, so you can easily find the features most relevant for your job.

## Manage your projects in a few clicks

Keeping on top of your jobs, in accordance with standards and norms, is simple:

Select the residential or commercial module according to your project.

Immediately get a list of materials with complete panel, switch, and socket configurations.

Tailor to project specifications, with simple customization options, a virtual panel with drag-and-drop, and standards compliance checker.

Produce documents for your projects and instant quotations for your residential customers.

## Two ways of working

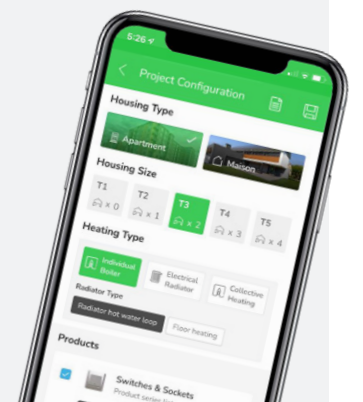

eDesign for **residential projects** enables you, in a few clicks, to configure room by room, select required smart home solutions (including switches, sockets, sensors, and more), customize the switchboard, create labels, and generate single-line diagram.

eDesign for **small commercial projects** makes the complex process of designing panels for larger buildings as easy as your residential projects, putting on-screen design and the virtual panel front and center of the experience.

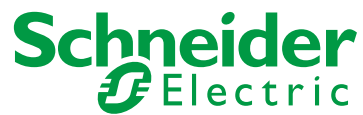

### Get faster quotations on site for your residential projects from mySchneider app

On site, from your mobile phone, start creating your residential projects from mySchneider app with the quotation tool to get instant quotations.

Thanks to its connection with eDesign, you can continue customizing the project from your computer in eDesign. This enables you to modify or add new elements in the electrical panel and then share the final quotation with your customer.
